

POOL AND SEPTIC TANK REMOVAL

A demolition permit is required for the removal of all pools or underground septic tanks. Permits are required prior to the demolition work.

Permit Issuance

Most pool or septic tank removal permits can be obtained on-line at www.e-OneStop.net. Permits can also be obtained at the One-Stop Permit Center: Following are the standard requirements when the pool or septic tank shell is to remain

- A minimum of three holes (each a minimum one foot in diameter) shall be drilled into the bottom of the pool floor or septic tank. The pool or septic tank is to be filled in with crushed rock (maximum 3/4" size) for a minimum of 8" deep at the bottom of the pool and then clean fill may be added.

Inspections Required

Two inspections are required for pool removals. The in-progress inspection should be scheduled when the holes along the pool floor or septic tank have been drilled and before it is filled. The final inspection should be scheduled after all work is completed.

If you have any questions, please call the City of Sunnyvale Building Division at (408) 730-7444. Information is also available on the Building Division web site at: www.sunnyvalebuilding.com.
